

Homemade Laundry Detergent/Soap by Food Storage Moms

1 Fels-Naptha Bar-grated either by hand, food processor, salad shooter, this is what I use

1 cup Borax Detergent Booster

1 cup Super-Washing Soda (not regular baking soda)

Put these 3 ingredients in a blender to blend and grate the Fels-Naptha even more. After doing this it will look just like the store purchased detergent but will not include all the "fillers". You will use less detergent per load and will have less "bubbles". Remember just having bubbles doesn't mean your clothes are clean. I use 1 teaspoon per load. I have an HE-High Efficiency washer and it works great!
